What The Dogs Doin?

The decision of where you take your pets is an ever-evolving issue, it is a relevant issue to all pet owners. The issue of a truly safe play area for the dogs is complicated, because most dog parks do not employ safety measures that protects against dog-on-dog violence. This issue is even more important for puppies who may not have the social experience for them to socialize between dogs. This is a very serious issue because they are most likely to either get injured or injure other dogs or even themselves. 😞

(Example: to the right)

How do we solve this issue?

There should be an app.

Most dog owners should be able to have access to an app that gives them personal experience based on their dog, that will help them find a place that will maximize the fun that their dog will have, while also being safe.
